CLINICAL RESEARCH:
WHAT IS ALL ABOUT?
...a focused training for busy investigators and study teams

WHEN

3rd EDITION | March 19 and 20, 2018
4th EDITION | June 4 and 5, 2018 (English version)
5th EDITION | October 15 and 16, 2018

TARGET AUDIENCE:
Health Care Professionals (doctors, allied health professionals, nurses, study coordinators, administrative assistants) with zero to 5 years of experience in Clinical Research and anyone who would like to learn the fundamentals of Good Clinical Practice and extend their knowledge in Clinical Research methodology and procedures.

DESCRIPTION:
Running clinical studies is a complex task that requires several skills. Skills ranging from Good Clinical Practice over all applicable regulations up to operational aspects on how to carry out clinical studies. Having a high trained and specialized study team conducting clinical research is the main key to achieving success in recruitment objectives and high standards of quality and performance.

This interactive 2-day course will provide you a comprehensive knowledge on the practical aspects of clinical studies, essential to reach the highest quality of data whilst ensuring the study participants’ safety and well-being and that your professional knowledge is optimized.

DAY 1
Session 1. Types of Studies and Research Design
Session 2. Regulatory Aspects
Session 3. Patient-Centered Research
Session 4. Clinical Study: the first contact with investigators and study team
